

PREPARING TO FIGHT CHOLERA

The Hamburg Authorities Think No Cause For Alarm Exists.

EMIGRANTS BEING DETAINED

The Authorities on This Side, Both in Washington and New York, Taking Steps to Bar the Infection Out.

Hamburg, Sept. 2.—The agent of the Imperial German office ordered all steerage passengers of the steamer *Moltke*, which sailed for New York Thursday, to be landed at Cuxhaven.

Later they were put on board a steamer lying off Brunsbaven and are under quarantine. It does not appear that there is any case of cholera among the steerage passengers, but the health office, which has become increasingly vigilant because of the discovered cholera case, thought it wisest to allow the emigrants to be landed for a fresh inspection and observation until Saturday, when if in health and none of them has been shown to have come in contact with cholera they may be allowed to proceed.

No additional cholera cases have been reported.

Seven new cholera cases were reported officially to the provincial government at Danzig, four in Nakel, on the River Netze, one at Usch and two at Fordian.

One death from cholera and five suspected cases have been discovered at Marienwerder.

An official note issued by the Hamburg government says that no cause for alarm exists. Preventive measures, the note says, are much more complete than they were in 1892-93, and the authorities are dealing with the situation thoroughly. All those who had come in contact with the dead Russian immigrant, the note says, are now quarantined.

PUTTING UP THE BARS.

Assistant Surgeon McLaughlin, at Naples, Ordered to Hamburg. Washington, Sept. 2.—Surgeon-General Wyman has already taken measures to prevent the spread of cholera from Germany to the United States by ordering Assistant Surgeon McLaughlin, now stationed at Naples, to proceed immediately to Hamburg.

Dr. McLaughlin has been directed to make a thorough investigation of the situation and to report in detail. He also has been directed to be prepared to enforce the treasury regulations relative to ships leaving for American ports. These regulations authorize the detention of suspected passengers and the fumigation of baggage when thought advisable.

EXTRA PRECAUTIONS.

The Health Officers at New York Will Watch Immigrants.

New York, Sept. 2.—That extra precautions shall be taken to prevent bringing in a case of cholera among immigrants from German ports was agreed to at a conference between Health Officer A. H. Doty, of this port, and the representatives of the several trans-Atlantic steamship companies. The plan is to exercise great care in taking immigrants on board ship at German ports. The discovery of a case of cholera in Hamburg was the cause of the conference. Dr. Doty said after the conference that he had no reason to think that cholera would get to New York, considering all the precautions being taken.

Forty-Three Cases Reported.

Berlin, Sept. 2.—Forty-three cases of cholera in all have been reported in West Prussia. Nine persons have died from the disease and many suspicious cases are under observation. The legal and medical machinery for dealing with this invasion of the Asiatic bacillus is now working at full pressure.

ENGLISH RAILROAD WRECK

Passenger Cars Crash Into Station, Killing Ten People and Injuring Twenty.

Witham, England, Sept. 2.—As the express from London to Cromer on the Great Eastern railway was entering Witham station several passenger cars left the track and crashed into the station buildings, causing the death of 10 persons, 6 of whom were women, and seriously injuring 20 persons.

Among those killed was the porter of the station, who was sitting in his room. He was crushed to death. Two ticket sellers were buried in the wreckage, but they escaped serious injury. The gasometers beneath the cars caught fire and consumed the wreckage. Fortunately, however, all the bodies were removed before the flames gained headway.

Dr. Franklin Clarke Liberated. Kingston, Jamaica, Sept. 2.—Dr. Franklin Clarke, of Boston, Mass., who was arrested here July 17 and held before the chief justice for breach of the official secret act by taking photographs of the fortifications at Port Royal, has been liberated.

Burned With Molten Steel. Donora, Pa., Sept. 2.—A large ladle filled with molten steel burst in the molding department of the United States Steel corporation's works at this place. One man was burned to a crisp and six others were seriously injured.

University of Chicago.

Chicago, Sept. 2.—At the fifty-sixth convocation of the University of Chicago degrees were received by 146 students. The convocation address was delivered by Hamilton Garland, whose subject was "Vanishing Trails."

Severe Hurricane in Costa Rica. San Jose, Costa Rica, Sept. 2.—A hurricane of extraordinary severity has caused considerable damage to the banana plantations. American enterprises suffered a great deal. No details of the losses are yet available.

AGRICULTURAL HINTS

STABLE VENTILATOR.

Simple Method by Which Fresh Air May Be Supplied to the Stock Without Draughts.

Down in New York there is a genial old shepherd and fruit-grower, J. S. Woodward, who gave me a hint as to how to arrange a ventilator on a sheep barn, or, in fact, on any sort of a stable. This ventilator is always in working order; there never is any chance for wind to blow into it, but always the air currents are out, as they should be, and when it is desired it is readily closed up tight, says Joseph E. Wing, in the *Breeders' Gazette*.

By reference to the illustration it will be seen that it consists of the ordinary cupola, which may be of any

HOW THE VENTILATOR WORKS.

form, on the sides of which are hinged light doors, the hinges at the top. These doors are connected by a board that holds one or both a little way ajar. Suppose the wind blows; one of them will shut and on the leeward side the other will be open. This makes it impossible for cold draughts to come down. Then, supposing you wish to lessen the amount of air entering, you simply draw down on a cord that is attached to the middle of the connecting board at a place where there is a hinge, and it bends there, drawing the doors together somewhat or close up as you like. I have seen the thing work and it is good. In the illustration the dotted line shows the ventilators closed; O shows them open.

DARK STABLES.

They Are Unhealthy Places in Which to Shelter Stock and Are Generally Dirty.

I have just been over to one of my neighbors who has completed an addition to his barn. In the addition are the stables for the cows and the horses. It is not wise for one to criticize his neighbor or, at least, to the neighbor's face, so I did not make any comment on the arrangements of the stable. But, says a writer in the *Farmers' Review*, I will express the opinion that the stables built are all wrong. I do not see how it will be possible to keep them clean. The great objection to them is the fact that they are on the north side of the barn and have no windows at all except the small windows that are made for the purpose of throwing out the manure, and which are kept covered with slides. Through these small apertures little light percolates. The stables will always be dark and that means that they will be always dirty and have in them bad smells. The man keeps six cows, and there is but one aperture behind the cows. Late in the winter the manure pile outside will be higher than the little window, which would not, of course, be left open in the winter anyway.

I have always found that a dark stable will continue to be a dirty stable, no matter what animals it is used. A man does not generally light a lantern to find the dirt in his stable, and that means that the stable is never perfectly cleaned out. The use of water in the stable that is dark results in dampness and mold. I have a strong sympathy for the animals shut up in a dark stable, either summer or winter.

BAD ROADS, HIGH PRICES.

The Two Nearly Always Go Together—Why the Farmer Loses in Marketing His Crops.

Men who have closely studied the markets have observed that during certain seasons of the year when the roads have been particularly bad over a large area the prices of certain commodities have been affected, and have risen in value in response to a decreased supply. In such cases the farmer able to put his produce upon the market, when his neighbors could not do likewise, has reaped the benefits. It naturally follows then that the better the conditions of the highways are the farmers in connection with such roads to realize on their products.

Better roads will mean, in addition to the other conveniences, a balance element for the market, says the *Prairie Farmer*. If all of the people are to benefit from the sale of their products, they must be able to have access to the market equally at all times. Otherwise the man most favorably located on a good road will reap the harvest. The telephone and the daily paper aid the farmer in keeping trace of the market, but this information will avail him little unless he is able to deliver his produce.

CAUTIONS TO DAIRYMEN.

Soft, white butter comes from hot cream. Too much sourness in cream causes white specks in butter.

After a cow passes much beyond nine years of age, she begins to deteriorate. Set milk after milking before it becomes as cool as the atmosphere. The cream will rise better.

Have the milk for the calves sweet and of the same temperature as when it comes from the cow. Never let the heifer become more than three years old before breeding. Cows which have been bred young are usually good milkers.

Traffic with Japan.

Japan's purchases from the United States in the fiscal year just closed amounted to \$51,724,728, an increase of \$27,000,000 over 1904; her sales to the United States aggregated \$52,113,372, an increase of \$3,600,000. In the three years 1903, 1904 and 1905, the United States bought \$142,000,000 worth of goods from Japan and paid the bill with \$97,000,000 worth of American goods and \$45,000,000 of American gold.

Wouldn't Be Missed.

A London Chronicle reporter who was fully alive to the dangers of his situation wrote as follows from the scene of the recent automobile races at Brighton, England: "Motor cars at racing speed sometimes run out of the course, and to prevent the possibility of any loss of valuable lives the ground level of the promenade will be occupied only by representatives of the press."

Lightning Jumper.

Although the flea holds the record for agility of movement among insects and is capable of a speed of nearly ten miles an hour, could it continue jumping without cessation and without tiring, it has little the better of the jumping mouse found in the African deserts, which clears ten feet at a jump at the rate of 800 feet a second.

Perhaps She Didn't Take It.

"What are you smiling at, John?" "At a little item I just read here. The writer says: 'The best of us talk too much.'"

And why should you laugh at that?"

"Why? Well, it's just because it's such a roundabout way of paying you a compliment, my dear!"—*Stray Stories*.

Sensible Prince.

Prince Killikoff, who has acquired fame in connection with the trans-Siberian railway, renounced his title and estates when a young man and emigrated to America, where he attended to a bolt-making machine at a salary of \$750 a week. He then got a position as engineer and eventually became a railway manager in Venezuela.

Honored by Sultan.

The sultan of Turkey has conferred on Prof. Herman V. Hilprecht, of Philadelphia, the Order of the Golden Liakak. The order was founded by Abdul Hamid in 1890, and the degree is usually conferred upon victorious Turkish generals for "valor and loyalty."

Remembered Comrades.

Sergeant Good, late of the Second West Yorkshire regiment (British), died the other day, leaving an estate of \$35,000 to the noncommissioned officers' mess of his old regiment to provide a library and dinner place. In his will he described the regiment as his "happy home."

Want Entertainment.

Canon Angier, biographer and editor of *Charles Lamb*, once uttered this pithy saying: "You may preach like an angel, but if you can whistle on a stick people ignore your preaching, and speak of you as 'the man who can whistle on a stick.'"

Seasickness Theory.

The latest theory in regard to seasickness is that it is a nervous trouble, which can be cured by a few drops of tincture of atropine in one of the eyes, or by simply putting a bandage over one eye.

Babylonia Town.

Marksboro, a town of 500 inhabitants in New Jersey, has earned the strange distinction of not reporting the birth of a baby for five years. There is not a cradle or baby carriage in the whole place.

Fruit and Nut Exports.

Fruit and nuts valued at \$15,000,556 were exported from the United States during the year ended June 30 last, as against similar exports valued at \$20,678,605 for the year ended June 30, 1904.

The Way to Win.

In life, as in poker, a good bluff is never called. The way to win is to have the goods, or what is next best, make people think you have.—*Detroit Free Press*.

Clothing and Appetite.

The way to insure a good appetite in very hot weather is, according to a German hygienic authority, to wear as light clothing as possible.

FEVER'S AFTER-EFFECTS

Did Not Disappear Until the Blood Was Renewed by Dr. Williams' Pink Pills.

Typhoid fever is sometimes called nervous fever. During the course of the fever the nerves are always profoundly disturbed, and when it is over they are left so sensitive that the patient has to be guarded against excitement. In the tonic treatment then demanded, regard must be paid not only to building up flesh but also to strengthening the nerves. A remedy that will do both, make sound flesh to repair waste and give new vigor to feeble nerves, is the most convenient and economical. Such a remedy is Dr. Williams' Pink Pills for Pale People.

One proof of this is the experience of Mr. Charles Worth, of East Vassalboro, Maine. He says: "I had a severe attack of typhoid fever late in the fall which left me very weak and debilitated. My heart palpitated, my breathing became difficult at the least exertion and there was numbness in both hands. I suffered in that way for nearly six months. As I did not grow out of it, did not in fact see the slightest improvement as time passed, I decided to use Dr. Williams' Pink Pills as I knew of some cures they had effected in cases like mine."

"Almost as soon as I began taking them I could see decided improvement after keeping on with them for several weeks I was completely well. I consider Dr. Williams' Pink Pills a most valuable remedy, and I am in the habit of recommending them to others afflicted as I was."

When the nerves ache and tremble it means that they are starving. The only way to feed them is through the blood, and the best food is Dr. Williams' Pink Pills. They are absolutely guaranteed to be free from opiates or other harmful drugs. They are sold by all druggists, or may be obtained directly from the Dr. Williams Medicine Co., Schenectady, N. Y.

HAVE YOU COWS?

If you have cream to separate a good Cream Separator is the most profitable investment you can possibly make. Delay means daily waste of time, labor and product. DE LAVAL CREAM SEPARATORS save \$10.00 per cow per year every year of use over all gravity setting systems and \$5.00 per cow over all separating separators. They receive the Grand Prize or Highest Award at St. Louis.

Buying trashy cash-in-advance separators is penny wise, dollar foolish. Such machines quickly lose their cost instead of saving it. If you have the ready cash DE LAVAL machines may be bought on such liberal terms that they actually pay for themselves. Send today for new catalogue and name of nearest local agent.

Severe Surgery.

The following conversation recently took place in India: Physician (with his ear to the patient's breast): "This is a curious swelling over the region of your heart, sir, which must be relieved at once."

Patient (anxiously)—That "swelling" is my pocketbook, doctor. Please reduce it too much.—*Medical Record*.

When a pretty girl asks to look at a man's watch it is safe to bet that she doesn't want to know the time, but to see if there is a woman's picture in it.—*Boston Globe*.

What's the use of worrying about whether or not we shall know each other in heaven? Few of us really know each other here.—*N. Y. Times*.

Sure Cure at Last.

Monticello, Miss., Sept. 4 (Special).—Lawrence County is almost daily in receipt of fresh evidence that a sure cure for kidney troubles has at last been found, and that cure is Dodd's Kidney Pills.

Among those who have reason to bless the Great American Kidney Remedy, Mrs. J. E. Baggett, of this place, Mrs. Baggett had dropsy. Dodd's Kidney Pills cured her.

"I was troubled with my kidneys," Mrs. Baggett says to her friends, "my urine would hardly pass. The doctors said I had dropsy. I have taken Dodd's Kidney Pills as directed, and am now a well woman."

Dodd's Kidney Pills cure the kidneys. Cured kidneys strain all the impurities out of the blood. That means pure blood, a sound, energetic body. Dodd's Kidney Pills are the greatest tonic the world has ever known.

Speaking of sure things, there is, in addition to death and taxes, the rent collector.—*Chicago Daily News*.

FREE—DON'T MISS THIS.

A Cure for Stomach Trouble—A New Method, by Absorption—No Drugs.

Do You Belch? It means a diseased Stomach. Are you afflicted with Short Breath, Gas, Sour Eructations, Heart Pains, Indigestion, Dyspepsia, Burning Pains and Lead Weight in Pit of Stomach, Acid Stomach, Distended Abdomen, Dizziness, Colic, Bad Breath or Any Other Stomach Trouble?

Let us send you a box of Mull's Anti-Belch Tablets free to convince you that it cures.

Nothing else like it known. It's sure and very pleasant. Cures by absorption. Harmless. No drugs. Stomach Trouble can't be cured otherwise—so says Medical Science. Drugs won't do—they eat up the Stomach and make you worse.

Know Mull's Anti-Belch Tablets. We care and we want you to know it, hence this offer.

SPECIAL OFFER.—The regular price of Mull's Anti-Belch Tablets is \$1.00 a box, but to introduce it to thousands of sufferers we will send two (2) boxes upon receipt of 75c and this advertisement, or we will send you a sample free for this coupon.

114 A FREE BOX. 114 Send this coupon with your name and address and druggist's name who does not carry a free box of Mull's Anti-Belch Tablets.

Give Full Address and Write Plainly. Sold at all druggists, 50c per box.

The great American public will forgive anything except poor ball playing.

Do not believe Pilo's Cure for Consumption has an equal for coughs and colds.—J. F. Boyer, Trinity Springs, Ind., Feb. 15, 1900.

The man who sows wild oats ought not to complain about the harvest.

THE WAITER WAS CURIOUS.

Poked His Hand Into a Bag of "Crab Apples" with Disastrous Result.

Four men, two of them carrying a big potato sack between them, walked into the Hotel Vendig early, at Twelfth and Market streets, shortly before closing time the other night, and sat down at one of the tables. The bag was carefully deposited in a corner, relates the *Philadelphia Press*.

A German waiter took the order with one eye on the sack. Finally his curiosity got the better of him. "Dot is a big bag, ain't it?" he said. "Vot is in him?"

"Apples, Fritz," said one of the men. "Take some home to the children."

The waiter accepted the invitation and plunged his hand into the sack. He brought it out again in a hurry, with a half-shell crab clinging to one of his fingers.

Two hundred brothers and sisters of the first crab promptly took advantage of the open mouth of the bag to crawl to liberty. They lugged out of the sack with a rush and took possession of the cafe, nipping everything in reach. Several seized trousers legs and shoestrings and held fast.

Heroic waiters made a sortie with brooms and swept the crustaceans back into the bag and tied it up securely. "Say, please," demanded the German waiter, sucking vigorously at his injured finger, "vot kind of apples do you call dose?"

"Crab-apples," said the four men, in chorus.

HOW TO TELL A STATESMAN

Not Only a Man Who Makes Speeches, But a Man Who Makes Good Ones.

The late Horatio G. Herrick, of Lawrence, for many years high sheriff of Essex county, always took a keen interest in the Lawrence schools, and was for a long time chairman of the school committee. Visiting the Saunders school soon after the death of Garfield, relates the *Boston Herald*, Sheriff Herrick spoke to the pupils of the life of the late distinguished statesman, and thus asked, generally.

"A statesman is a man who makes a statesman is."

"Hardly that," answered Mr. Herrick, who loved to tell this story. "For instance, I sometimes make speeches, and yet I am not a statesman."

The little hand again went up, and the answer came, triumphantly: "I know a statesman is a man who makes good speeches!"

Desired Effect. "Try to look a little pleasanter," said the photographer to Mr. Lyte-Phint. "Remember, I am making these pictures at half my usual rates." There, that will do nicely.—*Chicago Tribune*.

Perjury. Mrs. Bacon—Do you think your husband is getting better? Mrs. Egbert—No, worse. When he goes fishing now he's not satisfied to tell what he caught, but he makes an affidavit to it.—*Yonkers Statesman*.

A CLEAR COMPLEXION

A Simple Home Treatment for Blackheads, Red, Rough and Oily Skin and Disfiguring Humors.

If you are afflicted with pimples, blackheads, red, rough or oily skin, or disfiguring humors, you will find this simple home treatment most agreeable, speedily effective and economical. Gently smear the face with the great emollient skin cure, Cuticura Ointment, but do not rub. Wash off the ointment in five minutes with Cuticura Soap and hot water, and bathe freely. Repeat this morning and evening and you will soon be rewarded with a skin soft, white and clear. Cuticura Soap, the best toilet and complexion soap in the world, assisted by Cuticura Ointment, will preserve, purify and beautify the complexion and keep the skin in a healthy condition, preventing blackheads, pimples, eruptions or the return of eczema and other skin troubles. Used as a shampoo it cleanses the scalp of crusts and scales, removing dandruff and promoting the growth of the hair. For red, rough hands, itching palms and painful finger ends, Cuticura Soap and Ointment achieve marvelous results, often in a single night.

Often a man's interest in a project depends wholly on the rate.

CRANKS QUICKLY OUSTED.

General Miles' Expeditionary Method of Dismissing Annoying Inventors.

"Gen. Nelson A. Miles," said an inventor, "used to be continually besieged by cranks with pneumatic rapid-fire guns, subterranean rifles, dirigible war balloons, and all such martial inventions. The general would weed these cranks out with admirable speed," says the *Minneapolis Journal*.

"I sat in his office with him one day when a servant brought in a card. 'Oh, send him in,' said Gen. Miles. 'His business won't take more than a minute or two.'"

"So in came a wild-eyed, long-haired man, twisting his soft hat nervously in both hands. 'General,' he said, 'I have here—and he took out a small parcel—a bullet-proof coat. If the government would adopt this—'

"Put it on. Put it on," said Gen. Miles, as he rang the bell. The servant appeared as the inventor was getting into the coat.

"General," said the general, "tell the captain of the guard to order one of his men to load a rifle with ball cartridge and—"

"Excuse me, general, I forgot something," interrupted the inventor, and with a hunted look he disappeared.
